

Aurélien Darracq

ML Engineer | Data Engineer

📍 Madrid, Spain ✉️ darracq.aurelien@gmail.com 🔗 [aurélien-darracq](#) 🌐 aurelpow

Professional Profile

ML Engineer with 6+ years of experience in data, including 3+ years specializing in building production-grade ETL/ELT pipelines on Cloud. Proven track record in Scala/Spark & PySpark pipeline engineering, Medallion Architecture design, and MLOps foundations.

Experience

Machine Learning Engineer, Boycor – Madrid, Spain (Hybrid) Apr 2026 – present

- Optimized data pipelines and feature engineering workflows for machine learning models in investment banking, improving data readiness for training and inference.
- Migrated legacy ETL processes from monthly batch runs to daily ingestion using **PySpark** and custom **Python** libraries on **AWS SageMaker**.
- Analyzed data quality and transformed source data structures to support scalable ML model training and production inference.

Data Engineer, Sopra Steria – Madrid, Spain Feb 2026 – Apr 2026

- Developing and maintaining **Scala/Spark** data pipelines for consumer credit risk data processing on **IBM Cloud** and **Amazon S3** for client BNP Paribas / Cetelem.
- Orchestrating pipeline scheduling and dependency management using **Apache Airflow**.
- Implementing **CI/CD workflows** using **GitLab CI** to automate pipeline deployment and ensure code quality across environments.

ML & Data Engineer (promoted from Data Scientist), UST España & Latam – Madrid, Spain Aug 2023 – Feb 2026

- Refactored legacy **PySpark** batch jobs into native **Scala/Spark** on **GCP Dataproc**, reducing pipeline execution time by **92%** and cutting cluster costs through right-sized resource allocation.
- Architected a **Medallion Architecture** (Bronze/Silver/Gold layers) in **BigQuery** to enforce data lineage, schema consistency, and quality contracts for downstream ML and BI consumers.
- Migrated ML model training workflows from ad-hoc Pandas notebooks to modular **PySpark pipelines** on GCP Dataproc, making previously manual Data Scientist workflows reproducible, schedulable, and production-ready.
- Built modular, OOP-structured **Python** pipelines to productionize the data layer feeding Movistar Play's content recommendation engine, consolidating sources from Hive, MySQL, and BigQuery across 7 countries.
- Optimized **GCP Dataproc** cluster configurations (executor memory, parallelism, shuffle partitions) to maintain SLA adherence under variable data loads.

ML Engineer — Sports Analytics, TTFL Lab (Personal Project) Feb 2024 – Dec 2025

- Designed a real-time **NBA data ingestion pipeline** using Python APIs and **Cloud Functions** to process player tracking and box-score data into a **BigQuery** Data Warehouse (70+ years of historical data).
- Built an offline **XGBoost** scoring pipeline in Python to generate daily player performance predictions; orchestrated model retraining and batch inference via **Airflow DAGs**, with outputs loaded to BigQuery for dashboard consumption.

Data Analyst, ALTEN Spain – Madrid, Spain Sept 2021 – Aug 2023

- Built automated **SQL pipelines** to extract and consolidate consultant movement data for 14,000+ employees across 12 global perimeters, feeding reporting for senior management.
- Automated recurring weekly/monthly reporting workflows using **VBA**, reducing manual turnaround by 3–4 hours per cycle and adding data quality checks for local analysts.
- Led a 3-month internal **Power BI** training program for the Business Data department, standardizing dashboard development practices across the international division.

Junior Data Analyst, SNCF Réseau – Paris, France Sept 2020 – Oct 2021

- Built **VBA-automated Excel** tools connected to ERP exports to track procurement, accruals, and internal monitoring across the Finance department, replacing fully manual processes.
- Developed **Power BI** reports for operational staff covering budget tracking and business control topics.

Education

DataBird, Bootcamp in Data Analytics – France 2023 – 2023

INSEEC, MSc in Audit, Business Control & Finance – France 2019 – 2021

Certifications

Google Cloud Professional Machine Learning Engineer

Skills

Languages: Python (Advanced), SQL, Scala, PySpark, VBA

Data Engineering: Apache Spark, Apache Airflow, BigQuery, Medallion Architecture, Dataproc, ETL/ELT, Amazon S3

Cloud & Infrastructure: GCP (BigQuery, Dataproc, Cloud Functions, Pub/Sub), IBM Cloud, Docker, CI/CD (Jenkins, GitLab CI, GitHub Actions)

ML / AI Foundations: XGBoost, Scikit-learn, MLOps (CI/CD for ML pipelines)
